## Contact Details

Clinical staff can call on the Bladder and Bowel Care Services to give support, help or advice in the care of any particular patient or to assist in decision making.

Further advice is available from:

- Continence Service at Derriford Hospital – 01752 792444
- Continence Service at Torbay Hospital – 01626 357258
- Specialist Nurse for Continence Service – 01752 434759 (Livewell Southwest)
- Nurse Consultant for Continence Service – 01208 251333 (East Cornwall locality group – Kermow CCG)

## Suggested quantities to order or prescribe on prescription

Ensure when you are ordering or prescribing continence related products you order sufficient supplies to meet the patients' needs but reduce any unnecessary waste.

The prescribed continence products are the property of the named patients to whom they have been dispensed and must not be used for another patient.

Patients with long term catheters, sheaths or who require leg and night bags should have **a month's supply**.

Patients who require continence products for time limited periods should have the quantities adjusted accordingly to ensure sufficient supplies but to reduce the possibility of waste.

## Use of appliance contractors

Patients may obtain their supplies from either:

- Dispensing contractor (Community Pharmacy, Dispensing Doctor)
- Dispensing Appliance Contractor (DAC)

When prescribing or recommending products for prescribing, consideration of the patient's needs must be considered and the quantities should be sufficient to reflect the patient's requirements but minimise waste.

Patients requiring continence appliances can have these dispensed either by a DAC, a pharmacy contractor or a dispensing doctor.

Retrospective prescribing i.e. requesting delivery of a product before the prescription is submitted to the contractor must not occur.

Please see additional guidance regarding this on the [Medicines Optimisation Post Live](#)
